

Dear costumer.

In this time I finished your request about the system to calculate the average of goals, the system is simple, in the first box please enter the quantity of goals and in the second box please enter the expected goals, once you write the numbers the progress bar will be upgraping itself.

To clarify boxes only allow numbers so please use it correctly but don't be afraid in case you introduce letters just refresh the page or erase the letters.

Thank by your attention.

Best regards.

Your developer friend Isaac David Morera Vargas.
